

My comment regards the proposed Federal Telephone Privacy Law. We currently are operating under the Indiana Telephone Privacy Law. I clearly would not be in favor of any Federal Law that lessens the effectiveness of the Indiana law, or permits more solicitors to call me than what is permitted by Indiana Law. The Indiana Law has been very effective in eliminating unwanted calls yet provides for sincere charitable organizations needs. My unwanted calls have been reduced by 95% since I added my name to the Indiana list. Sometimes State Laws are more effective than Federal laws. Please consider the Indiana law when enacting a Federal law and do not pre-empt the more effective Indiana provisions.
